

Klik IT keeps J&P Cycles on the road with *Purge-it!*

Klik IT Product: ***Purge-it!***

Business Sector: **Online Retail**

*“At J&P Cycles we’re very satisfied with the **Purge-it!** archiving solution.”*

J&P Cycles was founded by John and Jill Parham in 1979. The company is passionate about living a life on two wheels and strives to be the best company of aftermarket parts and accessories for your motorcycle.

Background

J&P Cycles initially deployed ***Purge-it!*** in 2019 when the company was running JD Edwards EnterpriseOne 9.1. The company has since upgraded to 9.2.

J&P Cycles uses seven ***Purge-it!*** modules; Accounts Payable, General Ledger, Inventory, Purchasing, Sales, the Custom Module and the Custom Module Extension Pack.

Selecting a JDE archiving solution

The **top three reasons J&P Cycles chose *Purge-it!*** over a competitor’s product:

1. Klik IT’s archiving solution is **coded in E1 so there is no learning curve**
2. **Archive data can be accessed directly from the production environment**
3. *Purge-it!* is a **low maintenance archiving solution**

Installation & setup

*“Getting the **Purge-it!** software installed and up and running was straightforward. The Klik IT team are very easy to work with and we’ve found the ongoing support to be excellent.”*

At the outset, J&P Cycles pulled out between three and four years of data from the production system. Since then, using ***Purge-it!***, J&P Cycles has found it much easier to maintain the size of its production database.

Purge-it! in action

On an ongoing basis, J&P Cycles tends to purge some of the quick growth tables weekly, such as EDI and the custom tables. This is fast to complete using ***Purge-it!*** and only takes a couple of hours. The standard modules are purged annually.

*“One of the key differences we’ve experienced since deploying **Purge-it!** is that it’s far simpler to spot and resolve trouble areas around the large tables.”*

Archiving & Data Management for JD Edwards
